

As part of our continuing effort to keep you informed about METRO<sup>®</sup>BRICK products, we are now highlighting a different METRO<sup>®</sup>BRICK color each month via e-mail.

## Color of the Month- July, 2008 **507 Empire**

**Empire is the color of Gotham City**

**OK, it's a blatant marketing ploy.** But, our #507 Empire gray is the color of strength and power representing all that is metropolitan construction. This color is an excellent choice to illustrate structural integrity.

The look of #507 is well represented in all of the texture options, but it is especially well suited shown with the addition of ironspot for an even more dynamic look. Empire is a gray that is bold, but not cold, as it tends toward a warmer hue.

Empire is a perfect stand alone color-like a skyscraper stands alone. It can also be blended in combination with other METRO<sup>®</sup>BRICK colors.

- ◆ The color to show strength
